

ARBOR BOREHOLES
YOUR TRUST, OUR COMMITMENT

Reliable Water Solutions for Your Future

Welcome to a world of water certainty. Whether you are a home owner seeking off-grid independence, an agricultural enterprise need ingreliable irrigation, or a commercial business managing critical operations — **Arbor Borehole Drilling** is your trusted partner across South Africa.

500+ Projects

Successful completions across various provinces

15+ Years

Dedicated groundwater industry experience

Fully Licensed

Insured for your complete peace of mind

WHO WE SERVE

Built for South Africa's Most Demanding Water Needs

From residential properties to large-scale commercial operations, ArborBorehole Drilling delivers tailored water solutions across every sector. With certified technicians and state-of-the-art machinery, we are uniquely positioned to solve your most complex water challenges.

Homeowners

Achieve true off-grid water independence. Reduce municipal reliance, eliminate water shortages, and enjoy consistent, clean water — regardless of service interruptions.

Farmers & Agriculture

Power reliable irrigation and livestock watering with a dedicated borehole supply. Protect your harvests and livestock from drought and municipal restrictions.

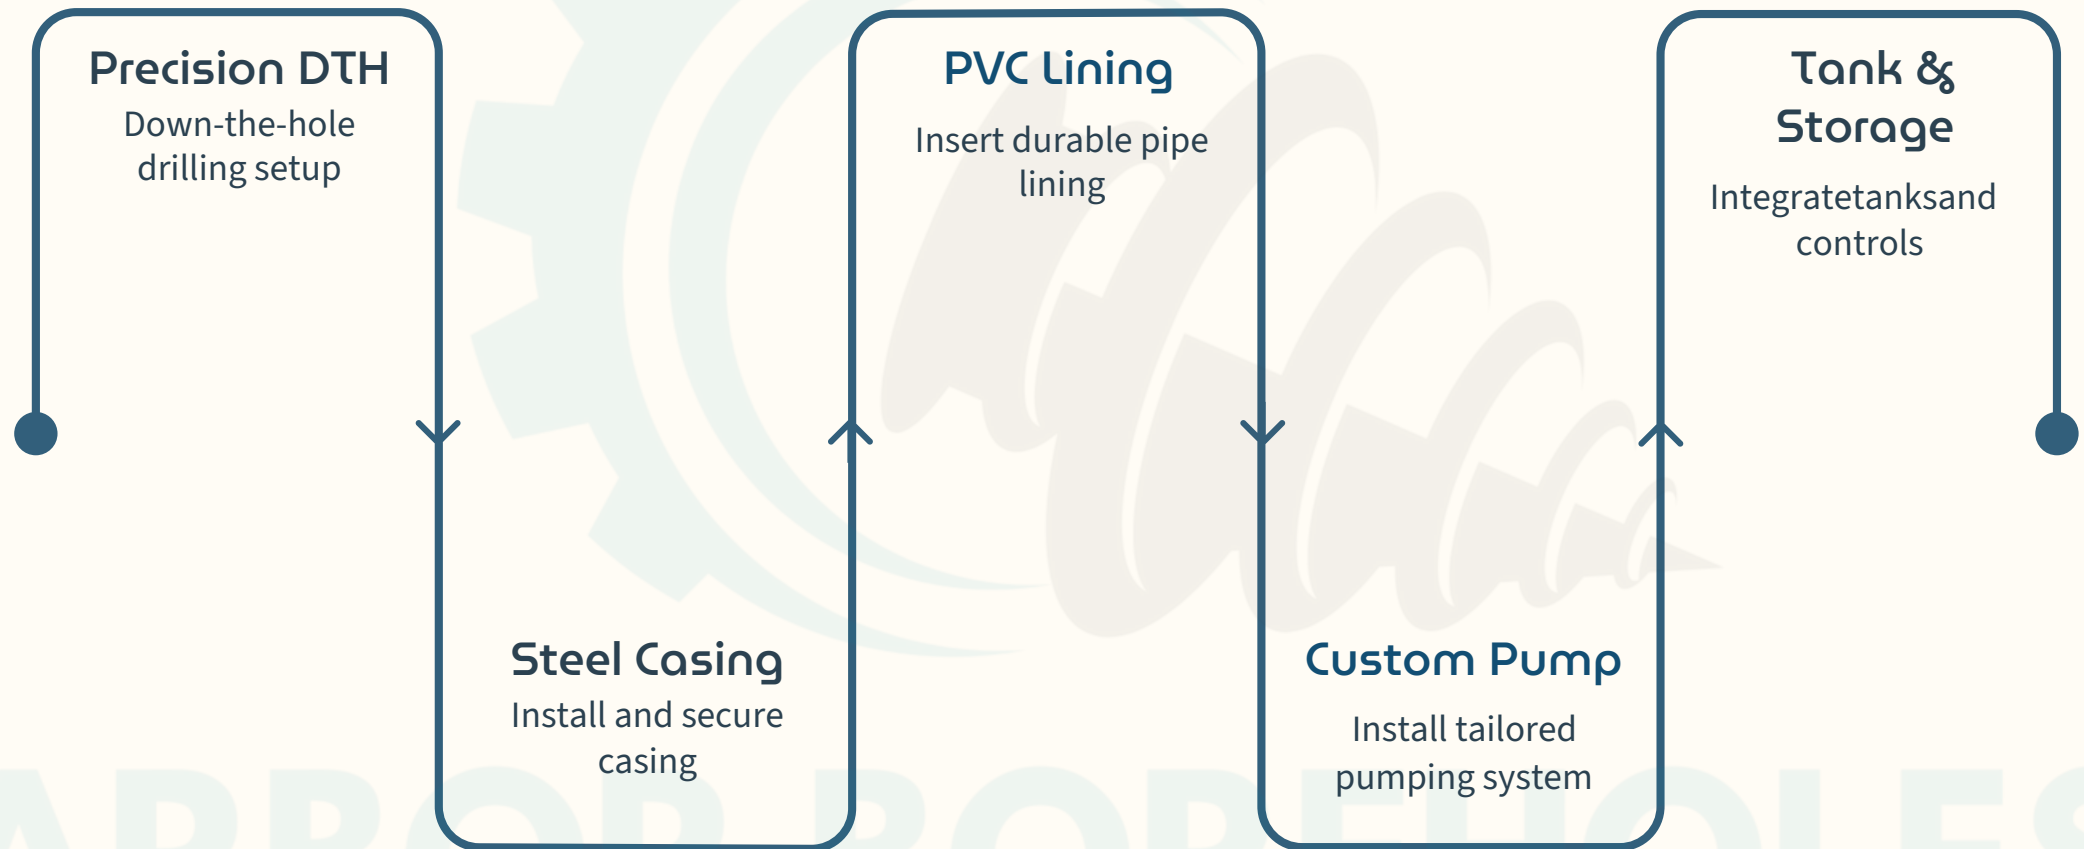

Commercial Clients

Secure uninterrupted water for manufacturing, hospitality, and facilities management. Reduce operational risk with a sustainable, on-site water source.

From Drilling to Flow: Our Proven 5-Step Process

We make complex groundwater engineering simple and transparent. Every project follows a rigorous, field-tested process—from the first strike of the drill to the moment water flows from your tap.

Each stage is executed by our certified technicians using industry-leading equipment, ensuring structural integrity, water quality, and long-term performance at every depth.

Precision Drilling & Structural Casing

DTH Drilling — Up to 250m Deep

We deploy high-powered Down-The-Hole (DTH) drilling technology, capable of reaching depths of up to 300 metres through any geological formation across South Africa — from hard rock to sandy alluvial layers. This precision ensures we tap into the most abundant and sustainable aquifers available on your property.

Heavy-Duty Steel Casing

Once the borehole is drilled, we install heavy-duty steel lining through the upper, unstable soil layers. This is critical for long-term borehole integrity — preventing soil collapse, blocking surface water ingress, and protecting against contamination from the very first day of operation.

PVC Lining & Custom Pump Engineering

Durable PVC Pipe Lining

For the deeper sections of the borehole, we install corrosion-resistant, food-grade PVC lining. This protects the water column from mineral leaching and physical debris, ensuring uninterrupted water flow and superior hygiene over the full lifespan of your borehole — typically 25 years or more.

Bespoke Pump Installation

Our engineers select and fit either submersible or surface-mounted pumps specifically matched to your borehole's tested yield and your property's daily demand. The result: a reliable, energy-efficient water supply that is perfectly calibrated to your needs — never over-pumped, never under-supplied.

STEP 5

Tank & Storage Integration

The final stage of every Arbor installation is the seamless integration of custom water storage tanks directly into your pumping system. This critical step transforms your borehole from a simple water source into a fully managed water supply system.

Consistent Water Pressure

Pressure vessels and header tanks are sized and positioned to deliver steady, reliable flow to every outlet on your property — from garden taps to showers.

Load-Shedding Resilience

Stored reserve capacity means your water supply continues uninterrupted during power outages — a critical advantage in today's South African energy environment.

Scalable Capacity

From a compact 2,500-litre domestic tank to multi-tank commercial installations exceeding 50,000 litres, we size every system to your exact operational requirements.

YOUR TRUST, OUR COMMITMENT

TURNKEY SOLUTIONS

Complete Turnkey Projects — We Handle It All

At Arbor Borehole Drilling, we believe that getting a borehole should never feel like a second job. From the very first site assessment to the moment crystal-clear water flows from your taps, our team manages every single step under one contract.

01

Geological Site Survey

We conduct a full hydrogeological assessment of your site and manage all required borehole drilling on your behalf.

02

Precision Drilling, Casing & Lining

Our certified rig operators complete all drilling and structural installation work to the highest industry standards.

03

Pump & Tank Engineering

Full mechanical installation, electrical connection, and system commissioning — handled entirely by our in-house team.

04

Yield Testing & Final Sign-Off

We test water yield, flow rate, and quality before handing over a fully commissioned, guaranteed water system.

YOUR TRUST, OUR COMMITMENT

THE ARBOR ADVANTAGE

Why Gauteng and surrounding provinces Trusts Arbor

15+ Years of Expertise

Deep local knowledge of South Africa's varied geology — from the hard rock of Johannesburg to the dolomitic formations of Pretoria, and diverse geological conditions across South Africa — means we locate water faster and more reliably than the competition.

Eco-Responsible Practices

We follow strict groundwater protection protocols in line with the National Water Act. Our drilling methods minimise environmental disruption and safeguard aquifer health for generations to come.

Certified & Fully Insured

All technicians hold recognised industry certifications. Our company carries full public liability and professional indemnity insurance — protecting you and your property at every stage.

YOUR TRUST, OUR COMMITMENT

OUR TRACK RECORD

Proven Results Across South Africa

Our portfolio speaks for itself. Over 500 completed projects across Gauteng and surrounding provinces' residential, agricultural, and commercial sectors — each one delivering a sustainable, long-term water solution.

500+

Projects Completed

Across Gauteng and surrounding provinces' residential, farming, and commercial sectors

250m

Maximum Drill Depth

Reaching the deepest, most reliable aquifer layers

15+

Years in Operation

Established expertise and a trusted local reputation

25+yr

Borehole Lifespan

Expected operational life of a properly installed Arbor borehole

📄 Every Arbor borehole is backed by a workmanship guarantee and post-installation support. We don't just drill and leave — we are your long-term water partner.

YOUR TRUST, OUR COMMITMENT

Secure Your Water Independence Today

Don't wait for the next water crisis to act. Join the hundreds of homeowners, farmers, and businesses across South Africa who have already taken control of their water future with Arbor Borehole Drilling. Our team is ready to assess your site, answer your questions, and deliver a no-obligation quote — fast.

Call Us

Speak directly with a borehole specialist about your property's unique requirements. We offer free telephonic consultations.
